

Where our electricity comes from

Like all energy companies, we are required to give our customers information on where we source our electricity. This information is provided in accordance with Electricity Supply Licence Condition 21, which has been implemented by the Electricity (Fuel Mix Disclosure) Regulations 2005 to give effect to article 3(6) of the EU Electricity Directive (2003/54/EC).

This information shows how we sourced our electricity supplied between April 2016 and March 2017.

Breeze Energy disclosure label (Total energy supplied in the period April 16 – March 17)		
Electricity supplied has been sourced from the following fuels:	% of total	
	Electricity supplied by Breeze Energy	UK Average
Coal	13.5%	8.5%
Natural Gas	41.4%	44.1%
Nuclear	11.3%	21%
Renewable	29.4%	24.2%
Other	4.4%	2.2%
Total	100%	100%
Environmental Impact		
CO ² emissions	298g per kWh	249g per kWh
Radioactive Waste	0.0008g per kWh	0.001g per kWh
For more information on the environmental impact of your electricity supply visit www.breezeenergy.co.uk or call 0191 348 1212.		

Carbon Dioxide Emissions - The weighted average of the carbon dioxide emitted in the production of electricity from each fuel source.

Radioactive Waste - The radioactive waste, being fuel burnt in the reactor to be subsequently discharged as spent fuel.
