

Where our electricity comes from

Like all energy companies, we are required to give our customers information on where we source our electricity. This information is provided in accordance with Electricity Supply Licence Condition 21, which has been implemented by the Electricity (Fuel Mix Disclosure) Regulations 2005 to give effect to article 3(6) of the EU Electricity Directive (2003/54/EC).

This information shows how we sourced our electricity supplied between April 2018 and March 2019.

Breeze Energy

| Energy Disclosure Label (relates to electricity supplied in the period April 2018 to March 2019) | | |
|--|-----------------------|-------------------|
| Electricity supplied has been sourced from the following fuels: | & of total | |
| | Breeze Energy | UK Average |
| Coal | 8.9% | 5.2% |
| Natural Gas | 60.30% | 41.4% |
| Nuclear | 18.1% | 18.7% |
| Renewable | 8.90% | 32.8% |
| Other | 3.8% | 1.9% |
| Environmental Impact | | |
| CO2 emissions | 327.167g per kWh | 208g per kWh |
| High-level radioactive waste | 0.00126g per kWh | 0.00130g per kWh |
| For more information on the environmental impact of your electricity supply visit www.breezeenergy.co.uk or call 0191 348 1212 | | |

Carbon Dioxide Emissions - The weighted average of the carbon dioxide emitted in the production of electricity from each fuel source.

Radioactive Waste - The radioactive waste, being fuel burnt in the reactor to be subsequently discharged as spent fuel.
